

Description

Talk-A-Phone's WEBS-RETRO-MT/R is a retrofit kit designed to convert an existing ETP-MT/R tower into a highly visible, WEBS-enabled audio broadcast tower. Once upgraded, the tower can be used as part of the Talk-A-Phone's Wide-Area Emergency Broadcast System (WEBS®) to notify large masses of people of an event with an intelligent message.

Talk-A-Phone's WEBS-RETRO-MT/R WEBS Retro Kit is often used in remote and high-risk areas where wide-area audio broadcast is desired, e.g. university and college campuses, parking facilities, shopping malls, medical centers, industrial campuses and transit facilities.

Features

- Supplements an Emergency Phone Tower with a highly effective Wide-Area Emergency Broadcast System
- Concealed high-power speakers provide 360° coverage
- Separate volume controls for each direction
- Local announcement capability with WEBS-RETRO-MIC (sold separately): personnel can unlock the local command station and make on-site announcements

Specifications

Dimensions (W x D x H):	12.5 x 10.5 x 14.2 in. (318 x 267 x 361 mm)
