

CALL STATIONS

ADA-compliant, IP66-rated call stations offer safety and emergency communications with a clean and intuitive interface.

- Analog and IP versions
- Exceptional sound clarity
- Weather-resistant faceplate
- One or two buttons
- WaveSense touchless option
- Optional handset
- Integrated camera available
- Built-in keypad option

BLUE LIGHT TOWERS

Highly visible, continuously-lit blue LED call station for campuses, health care facilities, walking paths, and other areas where security may be a concern.

- Accepts analog and IP call stations
- Available in steel or aluminum construction
- Wide range of colors and signage
- Camera, cellular, and solar options
- Optional high-power loudspeakers

WALL/SURFACE MOUNTS

Wall and surface mounted call stations—from slim fit surface mount enclosures ideal for tight spaces to an emergency trip button for mass-transit projects.

- Accepts analog and IP call stations
- Stainless steel construction
- Continuously-lit blue LED (wall mount only)
- Custom colors available
- Camera option
- Indoor and outdoor

ACCESS CONTROL

Access control and courtesy communication in wall mount, pedestal, and tower configurations complement today's commercial buildings.

- VIA™ Series with camera and call station
- Options include card reader (with or without keypad), push plate switch, and touch-free WaveSense technology
- Freestanding gooseneck pedestal for mounting call stations in drive-up applications

AREA OF REFUGE

Two-way, hands-free communication between each AOR location and the command center.

- Systems for 5 to 160 ADA-compliant AOR stations
- Analog and IP versions
- Supports outside phone line
- Meets requirements of NFPA 72
- Battery backup
- Built-in supervision
